DETAILED ACTION

1. This Office Action is responsive to the Amendment filed on 9/12/03.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1, 2, 4, 10 and 12 are rejected under 35 U.S.C. 102(e) as being anticipated by Czaja et al (6,424,631).

As per claims 1 and 10, see figure 1B and 3, and col. 7, line 4 to col. 8, line 64, Czaja et al discloses a method and associated system comprising:

step/means (206, 320a,...,320d) for predecoding data received at variable data rates and detecting quality information "hypothesis" of the predecoded data received at the respective data rates; and

Art Unit: 2631

step/means (322) for estimating the rate of the received data based on the quality information of the predecoded data at the respective data rates, wherein the pre-decoding is performed without using Viterbi decoding.

As per claim 2, Czaja et al discloses that the predecoding is performed using an inverse function "despreading" of generating function "spreading" used for encoding (see (106) of figure 1A and (206) of figure 1B).

As per claims 4 and 12, Czaja et al discloses step/means (210) for Viterbi decoding only the data corresponding to the estimated data rate (see figure 1B).

Allowable Subject Matter

4. Claims 5-9 and 13-40 are allowed.
5. Claims 3 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

6. Applicant's arguments filed on 9/12/03 have been fully considered.

Applicant's argument with respect to claims 1-3, 5, 7-11, 13-25 and 27-39 as being anticipated by Butler et al (5,566,206) are render moot. The rejections to the claims as being anticipated by Butler et al are now withdrawn since the claims have been amended to overcome the rejection.

However, claims 1, 2, 4, 10 and 12, after being amended, are deemed not patentable with the new ground of rejection as set forth above.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
